

10GbE XFP Optical Module

Overview

These hot-swappable, protocol-independent modules support 10 Gigabit Ethernet, SONET/SDH, and Fibre Channel standards. Compatible with leading OEM brands, our XFPs offer exceptional performance, low power consumption, and long-distance transmission capabilities. Perle 10 Gigabit Optical Transceivers are interchangeable, compact media connectors and enable a single network device to connect to a wide variety of fiber types and distances. FS 10G XFP/X2/XENPAK transceiver module solutions offers a variety of connectivity options for 10G Ethernet, 10G Fibre Channel, SDH STM-64 and OTN OTU2e links reach up to 220m-120km over duplex fibres. An XFP transceiver (10 Gigabit Small Form-factor Pluggable) is a hot-swappable optical module designed for high-speed telecom and carrier networks. Slightly larger than SFP+ modules, XFP operates independently of the host system's clocking, making it a flexible solution for long-haul and metro.
