

16-port PoE switch network management

Overview

Equipped with 16 auto-sensing 10/100/1000 Mbps RJ45 Gigabit Ethernet ports, the 16-Port PoE Web-Managed Gigabit Switch (561341) offers plenty of performance for your computers, servers and other networking devices. In addition, two small form-factor pluggable GBIC module slots (SFP) provide fiber connectivity for greater distances. 3at compliant devices attached to the switch require no additional power, thus eliminating the time and expense of electrical rewiring. The delay-time-per-port feature reduces the power spike that usually happens at system start, and the PoE priority feature (low, me. There are eight physical Quality of Service queues, Multicast filtering, Rapid Spanning Tree Protocol to avoid network loop, Multiple Spanning Tree Protocol (MSTP) to integrate VLAN and spanning tree, L.
