

1u rack-mount network cable management device

Overview

Engineered with precision, this 1U rack cable management panel fits seamlessly into standard 19-inch equipment racks, providing clean, professional, and space-efficient cable routing for low, medium, and high-density network infrastructures. Placing a 1U cable manager between your switch and patch panel can streamline your server rack cable management and improve network performance. The unique finger design protects cables from damage while the cover mounts with six hinge clips to allow the door to be opened one handed without becoming "unhinged".
