

## **2 optical switches**

## Overview

---

2X2 Fiber Optical Switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. The N7736C offers four independent 2x2 optical switches, ideal to bypass a device under test with a reference path, or to reverse the signal direction in a stimulus (source) - response (detector) setup. Mouser offers inventory, pricing, & datasheets for 2 Channel Optical Switches.
