

576 Optical Distribution Box Organization

Overview

YFDC-576A Fiber Distribution Cabinet, also known as Optic Distribution Cabinet, Fiber Optic Cabinet, has a variety of functions including leading optical cables, fixing and protecting, splicing and protecting fiber optic, storing and managing pigtails, parking lot . generally the OCC/ODC/FDT consists of several part, like integrated splicing unit, PLC. The cabinet provides mechanical and environmental protection for the splices and connector nterfaces while providing easy access for the service provider. This FDT is used for connecting, allocation and dispatching of communication optical cables to each optical distribution node, providing safe, reliable and flexible management equipment of optical fiber and cable for communication network. 1,19´ standard cabinet, large capacity, high intensity, modular structure, easy to cable splicing, distribution and storage.
