

72-core optical cable OPGW

Overview

AFL CentraCore OPGW (Optical Ground Wire) is preferred for its compact size and ability to house up to 72 fibers in a diameter starting at only 12mm. Aluminum-clad steel and aluminum alloy wires are stranded around the central element in single or multiple layers. OPGW is a type of cable structure with composite of optical transmission and overhead ground wire for power transmission. The fibers are placed closely in a sealed and water resistant stainless steel tube filled with water blocking gel.
