# Algeria Optical Cable Acquisition

## Overview

---

The Medusa subsea cable — 8,760 km, 24 fibre pairs at 20 Tbps each, 480 Tbps total — is coming online across the Mediterranean with Algeria as one of 21 confirmed landing countries. Marseille was lit in October 2025, Bizerte in November 2025 and Nador in December 2025. Algeria has taken another major step forward in its digital transition with the official launch of the Medusa submarine fibre optic cable, announced on Thursday at the port of Algiers by the Minister of Post and Telecommunications, Sid Ali Zerrouki. The Algeria Fiber Optic Cables Market is experiencing steady growth driven by increasing demand for high-speed internet services, advancements in telecommunication infrastructure, and government initiatives promoting digital connectivity. In line with this objective, Algeria Telecom plans to rely on local microenterprises financially supported by the National Agency for Microcredit Management (ANGEM).

## Algeria Optical Cable Acquisition

---

### Algeria to Be Connected to a Fourth Submarine Optical Cable

Algerian Minister of Post and Telecommunications announced the country will soon be connected to a fourth submarine optical fiber cable.

### Algeria Optical Communication and Networking Equipment Market

Optical communication and networking equipment, including fiber optic cables, switches, and routers, play a pivotal role in enabling high-bandwidth data transmission over long distances. Moreover,

### 8,700 km of fibre optic cable: Algeria connects th , Algeria Invest
