

American ABS box-type PLC optical splitter

Overview

PHX ABS box PLC planar waveguide beam splitter can provide 1x2, 1x4 and 1x32 PLC splitter. Planar lightwave circuit (PLC) splitter is a type of optical power management device that is fabricated using silica optical waveguide technology to distribute optical signals from Central Office (CO) to multiple premise locations. This PLC Splitter Module is a plastic module called an ABS box with ruggedized fiber jackets of 2mm and up to 3mm with no connectors. It provides the complete protection for inner optical components and cable, as well as designed for the convenient and reliable installation, but its volume is relatively large.
