

Applications of 10 Gigabit Optical Ports on Layer 3 Switches

Overview

10 GbE switches far surpass the data transfer capabilities of older Ethernet switches, capable of transmitting up to 10 gigabits of data per second. The adoption of 10 Gigabit Ethernet (10 GbE) solutions is primarily driven by the growing demand for 10 GbE switches, which offer improved bandwidth, lower latency, and faster data transfer, accompanied by massive growth in careers and personal life. SFP+ is commonly used in high-speed data transmission in data centers, servers, SANs and networking equipment. This guide intends to elucidate 10G SFP ports attached to Cisco switches with ease for a reader in a technical overview, where 10G SFP ports can be put to good use. VLAN Support: Supports up to 4K VLANs, as well as various VLAN functions such as Guest VLAN and Voice VLAN.
