

# **Brazil Passive Fiber Optic Router Bridging Mode**

## Overview

---

The answer, which is specific for this hardware and maybe even this ISP, is that there is no way to change the router to work in bridged mode, but there is a LAN port (port #4) that is dedicated to bridging. I have an optic cable that is plugged into the internet providers provided router, Huawei EchoLife HG8145V5. Here were the steps I took: Under "Advanced --> Connections" I set the option to transparent bridging.

## Brazil Passive Fiber Optic Router Bridging Mode

---

### How to access the router in bridge mode

Disconnect your router from the power cord and wait a few seconds before connecting it again. This will reboot the router into bridge mode. Ready! Now your router is configured in bridge
