

Building Distribution Box Model and Specifications

Overview

This document provides specifications for various distribution boxes including dimensions, mounting sizes, and number of ways. The metal distribution box is designed for a wide range of low-voltage applications in residential buildings, commercial complexes, offices, and industrial facilities. The hub distributes electrical power from a single input source to various circuits throughout a building. Establishing a connection between the main circuit breaker and several outbound circuits, they serve as the foundation of the distribution board.
