Cable and Distribution Box Connectors

Overview

Heavy duty cable connectors are robust modular interfaces designed to transmit power, data, and signals through a single housing. When used at the main cable entry of a distribution box, they replace traditional cable glands or hard-wired connections. Push-in termination of solid conductors, such as that offered by our junction box connectors, saves you plenty of time and money. Protect wiring from impact and the environment in runs indoors, outdoors, and underground Securely connect cords to enclosures while sealing out dirt and moisture Pass multiple cords into an enclosure while sealing out moisture, dust, and other contaminants Choose from our selection of box.
