

Cable tray circular at 90 degrees

Overview

Adaptable to curved cabling: They perfectly fit curved shapes in circular buildings, stadiums, theaters, and other locations, making cable laying smoother and avoiding cable stress caused by right-angle bends. (On condition that the products are used in the manner intended and/or in accordance with the current installation standards and/or with the recommendations of the manufacturer.) Characteristic of this steel type is that – prior to mechanical deformation – it is given a zinc coating by means of

a. How to 90 degree bend cable tray?

For a 90-degree bend, ensure the tray's internal radius meets the cable's minimum bend requirement.

Cable tray circular at 90 degrees
