

Cable tray with 60 bends

Overview

The cable tray vertical bend RVB 60 allows the direction of cable routing to be changed flexibly and vertically. 45° & 90° flat bends are available for light, medium and heavy duty cable tray systems with widths ranging from 50mm - 900mm. Characteristic of this steel type is that - prior to mechanical deformation - it is given a zinc coating by means of a continuous dipping process. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. Bend 90° Cable Tray ECT60 600mm PG with sizes H=60mm, W=600mm, E (thickness)=1,5mm, 90°, carbon steel, pre-galvanized according to NEN-EN 10346, including 8x EFS08x15-GEO Eurostrut fixing set (bolt M08x15, nut and washer).

Cable tray with 60 bends
