

# **Can a fiber optic cable have two routers**

## Overview

---

Yes, you can connect two routers to one fiber modem, but understanding the 'how' and 'why' is crucial for optimal network performance. In the basement, there is the ONT+residential gateway device that converts the light impulses to Ethernet. This ethernet will then go through a 1 Gbit/s switch, and rout two ethernet cables to each floor. Are all the strands in the optic fiber cable gonna work at the same time and are they compatible with the transceivers?

Thank you yes, for single-mode modules, you'll need single mode fiber/cable.
