

Can pump room cables be run through cable trays

Overview

Is it possible to use trays of wire mesh in a pump station?

Yes, but small wires such as sensors or control lines, mainly. But in the case of the large heavy power cables used to operate the pumps ladder trays are far. Which is the better practice in the event that piping must cross cable trays?

Is it dependent upon the pipe joining method or insulation?

If there's a chance of leakage I would think that routing the pipe under the cable trays would be better. Cable trays are a support system for electrical cables, power, signal, and communication and optical fiber cables. Cables or conductors leaving the cable tray and entering the equipment through a.
