

Comprehensive unit price of cable trays

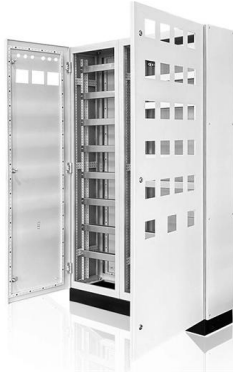

Overview

Steel trays typically cost between \$10-\$30 per meter, while aluminum trays range from \$20-\$50 per meter. Why do cable tray prices fluctuate?

Raw material costs, demand, competition, and supply chain factors all impact pricing. The target audience is small-scale consumers, so sales volumes can be high but per-unit profits are lower. They are strong, durable, and widely available, making them ideal for general-purpose electrical installations in residential, commercial, and industrial settings. Although metal pipes (conduit) may appear cheap initially, they tend to be the most costly option when the job is finally complete, since they consume a lot of time to install.
