

Construction Site Electrical Well Distribution Box Panel

Overview

They are available in versions with power levels from 17 kW (32A) to 130 kW (250A), all fitted with an emergency push-button. This sheet metal part commissioned by a US customer has a high degree of customization and requires precise manufacturing processes to meet the customer's requirements. A site box is an electrical device used on temporary sites such as construction sites, market stalls, campsites and trade fairs. The panels are made in a sturdy and handy two-component technopolymer cabinet with a fire-resistant backrest, which allows them to be stored and reused in. Gewiss' ACS system perfectly combines the various elements of the boards (casing, energy socket-outlets and protection devices) to guarantee the excellent electric and design coordination of conditions.

Construction Site Electrical Well Distribution Box Panel
