

Construction cost of mesh cable trays

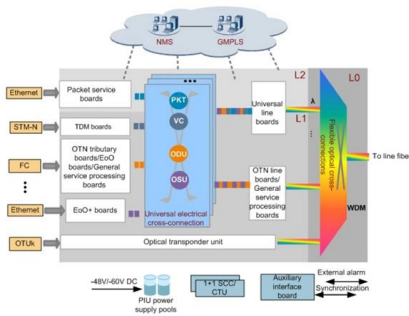

Overview

Basic cable tray systems cost \$3-15 per foot depending on type and material. Installation labor adds \$5-8 per foot to total project costs. Ladder trays typically cost 20-30% less than solid bottom systems. Bulk orders of 1000+ feet can reduce unit pricing by 15-25%. Regional variations exist. Cable trays will tend to be significantly less expensive to use in 2026 than metal pipes due to their faster installation. Wire mesh trays often come out ahead on total installed cost because: Labour time is lower. The main cost driver is the material used in manufacturing: Galvanized steel is the most common.
