

Core Switch Replacement Implementation Plan

Overview

This lab simulates a real-world enterprise network upgrade involving the replacement and configuration of core switches, port migration, ACL deployment, and rollback planning. I will be replacing a Cisco 3750x with a Nexus 3127 and would like some advice about how to go about the actual migration with the least downtime. What is this "replacement" you speak of?

I feel you should have a tiered replacement plan based on importance. But for edge devices like Firewall or any device that is critical to your infrastructure uptime/security, you would want to keep updated the. The rapid development of technology is forcing companies to continue to innovate, including in computer network device updates to support increasingly complex business needs.
