

Dedicated machine for distribution boxes

Overview

The electrical distribution box manufacturing machine is a specialized industrial system designed to automate the forming, cutting, punching, and assembly of enclosures used in power distribution systems. Automatic power distribution box production line manufacturer for 150-400mm depth electric enclosure forming and bending process. The AVRGT Team, with strong assembly capabilities and a professional engineering team, our box build services aim to meet customer expectations in terms of quality and reliability, and our 6 dedicated box build production lines, offer flexible and efficient assembly of complete products.
