

Development Trends of Network Server Racks

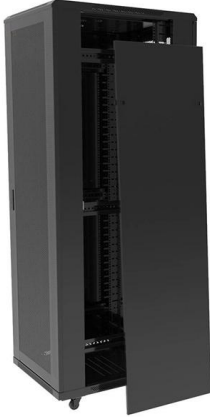

Overview

The global Data Centre Rack Market size as per revenue was worth approximately \$4. Factors driving the data center rack market growth include adoption of durable racks, surge in deployment in colocation or data center whitespace. The 43U to 52U rack height segment to hold the highest CAGR during the forecast period. Due to rising space constraints across organizations, rack sizes have increased to accommodate a greater number of racks. These taller racks provide the flexibility to house both tower and 19 inch rack-mount servers in the same unit.
