# **Distribution boxes must be equipped with brackets**

## Overview

---

**Wiring specifications:** The power should be turned off during wiring to ensure safety. Use high-temperature resistant copper core wire, and the cross-sectional area should meet the load current requirements. Choose the right box based on environment (indoor/outdoor), load capacity, and durability.

**Ensure safe placement:** install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. Both the box body and the door (if it contains electrical devices) must have secure and reliable protective earth terminals. Despite this, it often ekes out an inconspicuous existence in the basement or utility room until something stops working properly or an extension becomes.
