

Does the router not support gigabit fiber optic internet

Overview

When selecting a router for fiber optic internet, ensure it is a "fiber compatible router" with a Gigabit WAN port. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. The TP-Link Archer C7, for example, is a gigabit router: Hardware manufacturers are often misleading when marketing their wireless routers. 1 pc is connected to lan 1 and has gigabit, the other is connected to lan 2 and doesnt have gigabit.

Does the router not support gigabit fiber optic internet
