

# Engineering STS Distribution Box

## Overview

---

The STS AS400362-04 Power Distribution Box is essential for managing power distribution in industrial environments. This used unit provides reliable and efficient power management for various applications. MGE static transfer switches (STS) supply power to a range of equipment from two independent and redundant power sources. This system enables precise control of inverters, allowing seamless transitions between grid-tied and off-grid modes. 4404, AISI 316L) and are extremely robust: High-quality seal materials make them suitable for an extended temperature range, while a circumferential protection channel prevents.
