

# Fiber Optic Cable Tension Clip

## Overview

---

A tension clamp is a mechanical fixture used to anchor fiber optic cables—particularly ADSS (All-Dielectric Self-Supporting) cables and drop cables—at points of high mechanical stress, such as terminal poles, angle poles, or dead-end poles. With a combination of stainless steel wire and reinforced nylon body, Fibeye tension clamps offer excellent durability and performance. At Gcabling, we provide a complete set of reliable, corrosion-resistant tension clamp. Usually, the fiber laying around the electric transmission line or laying on the building is resistant and wears less than 50m. Fiber Savvy offers Clips to suffice a number of uses; browse our different styles and types in order to find exactly what you need.
