

Fiber optic cable and network cable panel

Overview

A fiber optic patch panel serves as a centralized, passive hardware enclosure that organizes, terminates, and protects fiber optic cables. It provides a static interface between structural trunk cabling and the dynamic patch cords that connect to active networking equipment. Consolidate your fiber optic connections in industrial environments with our DIN rail patch panel, with a modular design and tool-free installation save space and simplify deployment. NG4access[®] Cabled Modules available in all module sizes and fiber counts up to 864 fibers NG4access[®] Splice Tray Four sizes of interchangeable Propel fiber pass-through adapter packs provide the breadth of capabilities for virtually any configuration.
