

Fiber optic connection to the home with 2 routers

Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. In the basement, there is the ONT+residential gateway device that converts the light impulses to Ethernet. Bridging two routers on one network isn't as common as it used to be (thanks to mesh Wi-Fi systems), but it can still be an effective way to improve network access in larger.
