

Fiber to router speed is very fast

Overview

Fiber optic internet enables extremely high bandwidths with download speeds of up to 10 Gbps, which means it can transfer up to 10 megabits per millisecond. In comparison, the maximum speed of a DSL connection using copper cables is often limited to 250 Mbps. I was expecting dl speeds of 900+ on wired connection and 600+ on wifi when close to router, what I am getting is 100 (dl) on wired and max of 350mb on wifi when sitting on top of the router, other rooms in my apartment are getting 50-200~ on the wifi network. A gig fiber connection will provide around 1,000 Mbps download and 1,000 Mbps upload —but you won't always see those numbers if you run a speed check on your computer. Some providers already offer multigigabit speeds, such as AT&T's 5 Gbps (5,000 Mbps) fiber plan.

Fiber to router speed is very fast

Complete Guide to Fiber Optic Home Networking

Build a home fiber network for 1-2 Gbps speeds with this complete guide to installation, troubleshooting, and performance.

How Fast Is Fiber Optic Internet? Speed Revolution

Discover the blazing speeds of fiber optic internet and how it's revolutionizing connectivity. Learn about its advantages, real-world applications, and future

Take Your Wi-Fi From Slow to Speedy With a Few

Even if you have the newest router technology, you might not be getting the fastest speeds if your router is poorly placed.
