

# **Fireproof sealant for cable trays and busbars**

## Overview

---

Service penetration seals are passive fire protection systems designed to maintain the fire resistance of building element or section - wall or floor - where services such as cables, cable trays, pipes or ventilation ducts pass through them. Pyroplex Pressure Exerting Sealant expands multi-directionally when exposed to elevated temperatures, exerting pressure to seal and prevent the passage of fire and smoke through service penetrations. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0. our solutions are easy to use and help you ensure safety, efficiency and operational reliability through all phases of your construction project. Electrical cables and corrugated pipes in a cable tray, combustible pipes, multilayer pipes.
