

Formula appears on the incoming line of the distribution box

Overview

When certain criteria on a line in the table is met, I want to trigger a Message Box as a reminder for the user to do something. I'm putting the right equation but I'm still getting a red dotted lines around the box cell or sometimes it is just showing the equation I have typed without any result. This article outlines a simple approach that will help you easily display a message box in Excel, quickly and accurately. Column C should normally return the results of the calculating - not the formula itself. The Distribution box system diagram mainly includes the following parts: Incoming line part: Displays the incoming line source of the distribution box, which may be a single-line incoming line or multiple-line incoming lines (such as normal power supply and backup power supply), and marks the.

Formula appears on the incoming line of the distribution box
