

Four-Faith Terminal Box

Overview

It plays the role of transmitting long-distance wireless data for users through public NB-IoT networks in IoT-applied solutions and other smart interactive scenarios. With technological innovation as the core, it focuses on the research and development of high-tech products such as wireless communication technology, 5G and AI. Four-Faith key products including 5G CPE, Industrial Routers, Industrial Computer, LoRaWAN Gateways, Ip Modems and Intelligent Gateway. In distribution power grid, Feeder Terminal Unit (FTU) is the key point to realize feeder automation. Feature highlights: Feeder Terminal Unit (FTU) enables intelligent distribution grid automation, offering Fault Detection, Isolation, and Restoration (FDIR), multiple protection curves compliant with IEC ANSI standards, and support for 'four-remote' functions via communication protocols like IEC. After 10 years of development, our company has set up 4 subsidiary companies, including Four-Faith IoT, Four-Faith Smart Grid, Four-Faith International, Four-Faith Electronic.

Four-Faith Terminal Box

F8L10T LoRa Terminal

5 I/O port is provided, allowing the possibility to achieve 5 digital inputs and outputs. It's compatible with 3 pulse output, 3 analog input, and 2 pulse counting function.

LoRa/LoRaWAN Asset Monitoring Terminal F-LT300

LoRa/LoRaWAN Asset Monitoring Terminal F-LT300 is an Asset Monitoring Terminal that supports the LoRaWAN(TM) standard. This product is based on a three-axis

LTE NB-IoT F2910, Four-Faith

Four-Faith's F2910 NB-IoT is an IoT wireless data terminal. It plays the role of transmitting long-distance wireless data for users through public NB-IoT networks

Four-Faith F2X16 3G/4G Data Terminal Unit

Fully Compatible with 4G/3G/2.5G Network Ultra-Low Power Consumption Integration Terminal
Data Transparent Transmission Save the Data

LoRa Sensor Terminal

ansmission terminal. The terminal adopts Four-Faith self-developed LoRa module with ultra-low power consumption design and built-in high-capacity lithium battery, which can be used for many years. It

Feeder Terminal Unit F-FTU200 , Four-Faith Smart Power

Feeder Terminal Units main function is to realize Fault Detection, Isolation and Restoration (FDIR), reducing outage time, improving reliability of power supply.

LoRa Terminal Gateways Semtech F8L10T, Four-Faith

The Four-Faith LoRa terminal module adopts a LoRa modulation technique, acquired through many years of wireless network experiences to achieve a maximum

Los Angeles Times

Hier sollte eine Beschreibung angezeigt werden, diese Seite lässt dies jedoch nicht zu.

Four-Faith AI Video Box, Four-Faith

Four-Faith has broken through the bottleneck of data computing power and released a groundbreaking AI edge intelligent video box, solving the

Power Distribution Automation and 5G Communication Devices for

In distribution power grid, Feeder Terminal Unit (FTU) is the key point to realize feeder automation. Feeder Terminal Units main function is to realize Fault Detection, Isolation and Restoration (FDIR),

LoRa Sensor Terminal F8L10ST, Four-Faith

Four-Faith's F8L10ST is an IoT wireless data terminal based on LoRa technology, and it plays the role of data transmission through the LoRa network in real IoT

Four-Faith F2910 Nb-Iot Terminal with RS232 RS485

After 10 years of development, our company has set up 4 subsidiary companies, including Four-Faith IoT, Four-Faith Smart Grid, Four-Faith International, Four

4G LTE Modem, Four-Faith

Four-Faith's industrial modem is an IoT wireless data terminal. It adopts an advanced industrial-grade 32-bit processor and wireless module as the core. Four-Faith's industrial modem has been widely

Feeder Terminal Unit F-FTU200 , Four-Faith Smart Power

In distribution power grid, Feeder Terminal Unit (FTU) is the key point to realize feeder automation. Feeder Terminal Units main function is to realize Fault

Four-Faith Partner , EasyNet Technologies

Four-Faith hardware is deployed in more than 100 countries. Partners and end-users include Vodafone, AT& T, Orange, ABB, Schneider Electric, and China Mobile -- operators and industrial enterprises

NB-IoT Terminal, Four-Faith

NB-IoT terminal advance in low power consumption, wide coverage, low cost and large capacity, widely used in a variety of vertical industries.

Four-Faith ZigBee Terminal Used in Solar Power System

Four-Faith Solution To ensure that the solar energy system can be remotely monitored, managed and controlled over the Zigbee network, We

LoRa Sensor Terminal

Introduction FST200 series sensor terminal is a wireless data transmission terminal based on LoRa spread ansmisson terminal. The terminal adopts Four-Faith self-developed LoRa module with ultra

NB-IOT (DTU) F2910 , NB-IoT Terminal , Wireless Communication

NB-IoT has enhancements of 20dB gain more than LTE, it is equivalent to an increase of 100 times coverage area capacity more than LTE.

5G Routers, 5G CPE, Wireless Modems,

Four-Faith is the world's leading Internet of Things communication equipment and solution service provider. Four-Faith's key products include 5G Routers, LoRa

Unboxing Video of Four-Faith FST200 LoRa Sensor

Experience the thrill of discovery as we unveil the DC-powered edition of this state-of-the-art device. From the sleek design to the abundance of accessories,

LoRaWAN Sensor, Four-Faith

Four-Faith's FST200 is a wireless data transmission terminal based on LoRa technology. It adopts a self-developed LoRa module with ultra-low power

LoRaWAN , LoRa gateway, Four-Faith

Four-Faith owns multiple LoRa product lines including the LoRa terminal, LoRa gateway, and LoRa module. Using the LoRa, LoRaWAN technology, use license

Four-Faith brings innovative smart power

technology to the 2024

Four-Faith's distribution automation products primarily consist of reclosers, load switches, and FTU control boxes. These components enable rapid fault location and isolation while maintaining

LoRaWAN Gateway

It can be connected to LoRaWAN® terminals in various application nodes, collects useful information, and sends the data to cloud server through wireless 3G/4G cellular network or wired ethernet. The

Four-Faith F-FTU Series Control Box Feeder Terminal Unit

Feature highlights: Feeder Terminal Unit (FTU) enables intelligent distribution grid automation, offering Fault Detection, Isolation, and Restoration (FDIR), multiple protection curves compliant with IEC
