

# **GPON Optical Port Module**

## Overview

---

GPON SFP is one type of gigabit optical transceivers that are used in GPON system, which is compliant with ITU-T G. It is a bidirectional module that has SC receptacle and works over simplex single-mode fiber optic cable. The ODN is composed of passive optical components (POS), such as optical fibers, and one or more passive optical splitters. These compact, plug-and-playable devices are engineered to meet the rigorous demands of. Cisco ME Series products support any fiber-based (FTTx) access scenarios, including Fiber To The Home (FTTH), Fiber To The Building (FTTB), Fiber To The Curb (FTTC). The GPON module allows any RouterBOARD device to be used for Fiber to Home installations without any special modems or software.
