

General Optical Cable Models

Overview

Fiber optic cables are broadly divided into two types: "single mode" and "multimode" based on their characteristics. Each mode has a different way of transmitting optical signals and is suitable for different applications, so it is important to select the correct mode depending on. Whether you need fiber for a 5G backhaul or copper for enterprise LAN, we manufacture every cable type your. Delivering Solutions Fiber Optic Cable Products This catalog contains in-depth information on the General Cable line of fiber optic cable for voice, video and data transmission. I: Classification code and its meaning are: GY—room (field) optical cable for communication; GR—soft optical cable for communication; GJ - optical cable in communication room (office); GS - optical cable in communication equipment; GH - submarine optical cable for communication; GT - special. Covers the basics of fiber optic technology, including how light waves transmit data through thin strands of glass or plastic, and why fiber optics surpass.
