

Global Energy Internet Prices

Overview

The Energy Prices database provides end-user prices by sector (industry, household, transport, commercial, electricity generation) and 20 fuels and energy carriers, for 150 countries, with weekly, monthly, quarterly and yearly data. Each data point is collected and cross-checked by our staff using multiple sources and without automation. Combination of regularly-updated world energy prices covering 150 countries, and energy prices and taxes for OECD countries The Energy Prices data service is composed of a main database and several datasets. Statista+ offers additional, data-driven services, tailored to your specific needs. According to CEOWORLD magazine's 2025 Global Internet Pricing Index, the gap between the world's cheapest and most expensive internet is staggering.
