

Grounding tag for distribution box

Overview

Application: Earth tags are typically used in conjunction with cable glands in electrical panels, distribution boxes, and industrial enclosures to ensure proper grounding and reduce the effects of electromagnetic interference (EMI). 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. Whether you're a seasoned pro or just starting out, this comprehensive guide will give you practical. Electrical grounding safety labels remind people of the importance of properly grounding electrically-powered equipment to avoid the risk of fire and electric shock.
