

High-density 4U switch

Overview

It features 64x 400G QSFP-DD ports within a 4U chassis, delivering exceptional port density and powerful data forwarding capabilities. The NC8400-4TH switch supports a maximum of 128x 40G/100G, or 64x 40/100G with 16x 400G high-density ports through flexible line cards combinations of NC8400-32C and NC8400-16CD. It's optimal for spine deployments in large data centers, HPC, service providers and cloud providers. This foundational design empowers organizations to architect a highly scalable, cost-efficient, and energy-optimized network. A shared cooling, power and networking infrastructure is key to the high density and server efficiency offered by blade solutions.
