

# **High-density FTTH take-up and pay-off frame high precision in stock**

## Overview

---

PPC's Optical Distribution Frame is designed to accommodate high density feeder panels or splitter panels used in FTTH PON networks. The rack can be made as a standalone solution, or as a side-by-side system with integrated cable management in the middle. It is an important part of building a safe and flexible optical network environment. The system can be deployed in multiple applications including central office, headend, FTTx, FTTCs, and data center.
