

High-voltage threaded armored optical cable

Overview

Reinforced with corrugated steel tape (CST) or steel wire armor (SWA), these cables are specifically designed to resist rodent attacks, mechanical impact, and soil pressure —ensuring long-lasting, reliable data transmission even in the most challenging field conditions. - Abrasion resistant while maintaining flexibility - Bend to tighter radius and thinner than standard plastic fiber optics - Solid, smooth and sturdy sheathing - Superior resistance to wear, chemicals and other environmental. ETK Kablo 's Metallic Armored Fiber Optic Cables are engineered for maximum mechanical protection and durability in outdoor, underground, and industrial environments. The industrial armored cable features strong tensile strength, strong pressure and rodents resistance, and good flexibility characteristics.
