

# **How large a router is needed for gigabit fiber optic internet**

## Overview

---

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). To find the best router for fiber internet, we used our expertise to select items based on key specs, such as speeds, coverage, wireless standards, security, weight, and additional features. Instead of using your old router, a high-performance Wi-Fi router designed for fiber optic internet will ensure you seamless streaming, online gaming, and remote work all over your space.
