

How much does a large-spectrum analyzer cost

Overview

Prices for new spectrum analyzers typically range from \$1,500 to \$50,000, depending on the frequency range, resolution bandwidth, and additional features such as real-time analysis and advanced connectivity. Understanding this price range is crucial as you consider your investment and search for the analyzer that meets your technical requirements and budget. We stock a large selection of Spectrum Analysers, including new and most popular products from the world's top manufacturers including: Keysight Technologies, Rohde & Schwarz, GW Instek, Aim-tti Instruments & Rigol Were these search results. It is even possible to run them on PCs with a relatively small amount of hardware. Spectrum analysers tend to fall into 4 form factors: Benchtop - can be plugged into AC power, which generally means in a lab environment or production/manufacturing area.
