

How much does a single chip cost for a terminal box

Overview

CoWoS-S packaging costs approximately \$750 per chip for H100-class designs; CoWoS-L costs \$1,000-\$1,100 for NVIDIA's B200 — a 47% premium driven by multi-die complexity. ChipCart is revolutionising the electronic components industry by digitising the process of procurement and logistics from multiple sources, including distributors, suppliers, partners and more. IC Package Price Estimator is an automated online package price estimation tool that covers all the major semiconductor package types exist today. Simply select the package type, number of pins and volume and the tool will send you an email with the estimated package price. Trusted by 1,000+ engineers monthly and cited by ChatGPT, Perplexity, and Gemini. Quick answer: Semiconductor chip manufacturing costs range from \$1-5 for a simple IoT chip (28nm) to \$3,000-13,000+ for a cutting-edge AI accelerator (3nm with HBM and CoWoS packaging).
