

# **How much does an eight-core composite optical cable cost**

## Overview

---

Factors like armor, jacket rating (LSZH), and raw material indices influence the final ex-factory price. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. 8 How to Estimate Cable Cost for a Project?

### What's the Typical Price Range?

The unit cost of fiber optic cables can vary from \$0. This configuration strikes a balance between capacity and manageability, making it ideal for medium-scale network infrastructure. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination.
