

# How to connect a 3-meter fiber optic jumper cable

## Overview

---

Connect one end of the optical fiber to the device port, route the other end through the cabling slot, pull out the fiber tray, wrap the excess optical fiber into a circle, lay it on the fiber tray, wrap it with fiber bundling tape, and push it onto the fiber. Connect your launch reference jumper directly from your light source to your power meter. optic cable is sensitive to excessive pulling, bending, and crushing forces. FC Connector: use a metal sleeve for external reinforcement, fastened with a screw fastener. Generally used in the ODF (the most used on MDF) SC Connector: connected to the GBIC module, its. These cables link the end devices to a network or join the network components in a fiber optic configuration. Good management of fiber jumper can not only reduce the operating cost of the entire fiber optic network, make it beautiful and convenient, but also increase the reliability and flexibility of network operation and maintenance.
