

How to connect the ground wire of the mobile optical distribution box

Overview

Attach a ground wire from one of the threaded studs (A) at the bottom of the housing, to the mounting plate (B). 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. What to do if there is no ground wire, how to connect ground a ground wire to a metal box, a light switch or a receptacle or connect ground wires together. While traditionally this has been connected to 2 ground rods, in a new building it is recommended, and often required, that it be connected to an Ufer ground, which is basically a ground rod in the. Whether you're a seasoned pro or just starting out, this comprehensive guide will give you practical insights into proper grounding techniques, with a special focus on how selecting quality materials from a reliable building material supplier impacts your entire system's safety and longevity.
