

# **How to connect the splitter cable when installing broadband**

## Overview

---

If you have a home phone, connect the ADSL splitter to the phone jack, and plug your modem and phone into the splitter. However, to connect to the Internet using broadband, you have to install your broadband system. A splitter is a device that allows you to divide a single internet connection from your modem into multiple ports, enabling you to connect several devices simultaneously. While direct, dedicated coaxial cabling is often optimal, resource constraints (like a limited number of wall.
