

How to draw an arc on a cable tray

Overview

Getting the center point can be achieved by drawing a perpendicular line to the cable tray curve direction and projecting the second point onto this line, by which we can locate the center. Is there any workaround other than splitting it with regular intervals and modelling it originally as an arc / spline?

08-27-2014 06:03 AM what you could do is to create a special equipment/generic model to represent this. What's the quickest and most accurate to draw the tray?

What's the smallest angle of cable tray elbow that can be purchased and installed for this project?

Pierre Navarra of Sona-Architecture solved how to get BendRadius center of cable tray fittings with lots of valuable help from Moustafa Khalil from SharpBIM coding and Mohamed Arshad K: Question: I need to get the length of a cable tray fitting. You can change most values while drawing and editing in the Cableway dialog that opens when you start to draw or edit.
