

How to get fiber optic patch cords into a cable management unit

Overview

Ensure you have cords of the right length available and that panels are fitted with correct cable management accessories. Managing fiber optic patch cables requires strict adherence to technical standards due to the unique material properties of the cables. Belden's Enclosure Cable management products maintain proper bend radius of copper and fiber patch cords to provide easy access to connectivity, reduced patch cable routing complexity and simplified moves, adds and changes. As you work in the telecommunications field, you face complex challenges from rapid network growth and increasing data demands. An end-to-end cabling system is an ideal solution for data centers especially when time for traditional cable installation and termination is limited.
