

How to use a fiber optic array stripper

Overview

Use the fiber strippers to strip ~1" (25mm) from the end of the fiber in 3 steps, about 1/4-3/8" (6-8mm) at a time. Hold the stripper at a 45degree angle to the fiber to reduce stress on the fiber. In an industry where precision is not just a goal but a requirement, the quality of your stripping tool directly impacts signal integrity, network reliability, and overall. In order to successfully install or repair almost any fiber optic cable, knowing how to properly use a three-hole stripper can alleviate a lot of headaches.
