

Installation of 10 Gigabit Optical Module

Overview

This installation note provides the installation instructions for the 10-Gigabit XFP transceiver modules, which are hot-swappable input/output (I/O) devices that plug into a 10-Gigabit port. Part numbers: 10338, AA1403043-E6 The 10GBASE-T copper SFP+ module provides a 10 Gb connection using unshielded twisted pair (UTP) Category 6A cable. The XFP transceiver modules connect the system module port with a fiber-optic network. An optical module is an optoelectronic conversion device that transmits data by converting electrical signals into optical signals. Their compact size, low power consumption, and versatility across multimode and single-mode fiber make them a critical.
